

STRATEGY & PRACTICAL ADOPTION

Powering Our Daily Work (Without Disruption)

Rather than altering how DAS Bahrain operates today, our plan is to connect a secure cloud database and backend admin portal to our live website—making everyday order handling faster, easier, and error-free.

Our Live Storefront

Already showcases Alsi Cola, energy drinks, and food items with carton/unit toggles and BenefitPay. It gives customers a credible direct channel.

The Missing Link: Cloud Database

By connecting a lightweight cloud database (hosted securely on Google Cloud/AWS), every order, inquiry, and customer contact is saved instantly and securely.

Backend Admin Portal (/admin)

A password-protected screen where our staff manages orders, edits stock, and updates prices in seconds from any laptop or mobile phone.

Marketing & Phased Growth

Once our team is comfortable using the backend daily, we can roll out customer tracking, cold store wholesale logins, and van tools as we expand.

Guiding Principle

Zero disruption to our current sales routine. We start by using the website as a practical daily tool for our staff, then expand features as our order volume grows.

SYSTEM OVERVIEW

The Customer Storefront + The Employee Portal

One unified platform powered by a secure cloud database, serving both our buyers and our office team.

1. Customer-Facing Storefront

Who uses it: Retail shoppers, families, offices, and cold stores.

What they do:

- Browse full beverage & grocery catalogue.
- Select single cans or wholesale cartons.
- Place orders via BenefitPay QR & WhatsApp.
- Submit B2B wholesale inquiries across Bahrain.

2. Backend Employee Portal (/admin)

Who uses it: DAS sales team, dispatchers, and management.

What they do:

- See incoming orders in one organized live list.
- Update carton prices and mark items out-of-stock.
- Access customer phone numbers and delivery addresses.
- Export customer contacts for marketing and broadcasts.

HOW IT WORKS BEHIND THE SCENES

SECURE CLOUD SETUP

Public Website ↔ Secure Cloud Database (PostgreSQL) ↔ Employee Admin Portal

Direct Day-to-Day Benefit

Our team no longer relies on scattered WhatsApp chats or scraps of paper. Orders and customer contacts automatically land in our private back-office screen.

DAY-TO-DAY ADMINISTRATIVE WORK

How the Backend Admin Portal Helps Us Daily

Simple, practical features that make daily tasks faster, organized, and reliable.

WHAT DAS STAFF SEES IN THE BACKEND (/ADMIN)

LIVE ORDER DESK

Order #	Customer / Store	Items Ordered	Total	Action
#1041	Fatima A. (Riffa)	2 Cartons Alsi Cola	6.000 BHD	NEW ORDER
#1040	Al Hidd Cold Store	10 Cartons Alsi + 5 Code Red	42.500 BHD	PACKING
#1039	Ali Mansoor (Manama)	1 Carton Alsi Diet	3.000 BHD	DISPATCHED

Zero Lost Orders

Every BenefitPay and WhatsApp order is logged with timestamp, customer name, and phone number. Nothing gets missed or forgotten.

1-Click Price & Stock Control

Need to adjust carton prices or mark a product out-of-stock? Toggle it on your phone, and the live website updates in 2 seconds.

Central Bahrain Address Book

All customer addresses (Governorate, Block, Road, Building) are stored neatly. Ready for delivery dispatch anytime.

Customer List for Marketing

Export verified customer phone numbers to send WhatsApp promotional broadcasts when new products or deals arrive.

Why Staff Will Love It

Takes 2 minutes to learn. Runs on any phone or laptop browser. Saves hours of back-and-forth phone calls and note-taking every single week.

EXPANSION STEP 1 & 2 • MARKETING & RETENTION

Customer Tracking & Cold Store Accounts

Features that boost repeat orders and build loyalty as part of our sales expansion.

Customer Login & 1-Tap Reorder

Customers sign in with their mobile number. They see their past purchases and can reorder their favorite Alsi Cola case in 10 seconds.

Baqala Wholesale Portal

Cold stores enter their Bahrain CR number to unlock discounted wholesale carton rates, reordering at night directly from their bed.

WHAT CUSTOMERS SEE: LIVE 5-STAGE ORDER PROGRESS

LIVE STATUS

1. Received

Order In

2. Confirmed

BenefitPay Checked

3. Packed

Warehouse Hub

4. In Van

Out for Delivery

5. Delivered

At Door

Commercial Value for DAS Bahrain

Customers stop calling to ask "where is my drink order?". They see their delivery status live, while baqalas can request stock whenever they run low.

EXPANSION STEP 3 & 4 • VAN DELIVERY & COMPLIANCE

Van Delivery Checklist & Daily Cash Check

Tools introduced as van routes expand, ensuring zero lost stock and seamless compliance.

Driver Phone Checklist (/driver)

Van drivers open a simple mobile page on their phone showing today's 10–15 delivery stops with store names, crate counts, and 1-tap phone calls.

6:00 PM Stock & Cash Tally

Morning crates loaded vs. evening returns = verified crates sold. Cash collected + BenefitPay receipts must match 100% before drivers leave.

LMRA & Visa Expiry Warnings

Automatic 60-day alerts for driver CPR, driving licenses, and work permits—protecting DAS Bahrain from government fines.

1-Click WPS Bank Salary File

Generates the exact SIF payroll file required by Bahrain banks (NBB, BBK, Ila, AUB) for monthly Wages Protection System compliance.

Why this protects our margins

Eliminates lost delivery notes, prevents missing inventory, and ensures all cash is deposited safely at the end of each shift.

A GROUNDED, PHASED ROLLOUT

How We Move Forward at Our Own Pace

A simple 3-step path to start benefiting from the platform today without taking on unnecessary risks.

1 Step 1: Connect Cloud Database

Set up the secure cloud database and backend admin screen. Staff starts using it to manage live orders and catalogue without changing anything for customers.

2 Step 2: Customer Order Tracking

Once the team is comfortable with the admin portal, activate customer accounts and live order tracking to reduce phone calls and build repeat buyers.

3 Step 3: Cold Store & Van Routes

As wholesale marketing expands, give partner cold stores their login and equip van drivers with their mobile delivery stop checklist.

4 Step 4: Cash Audit & HR Compliance

Introduce daily van cash reconciliation, LMRA visa reminders, and WPS payroll exports when administrative volume demands it.

Recommendation for Internal Discussion:

We suggest beginning with **Step 1 (Connecting the Cloud Database & Backend Admin Portal)**. It requires zero downtime, costs virtually nothing to run on modern cloud tiers, and immediately gives our staff a clean, centralized workspace to manage daily orders and customer contacts.
