VAN CASH & STOCK AUDIT TRACE

4 Phases

MODULAR PHASED ROLLOUT

1. EXECUTIVE OVERVIEW & STRATEGIC INTENT

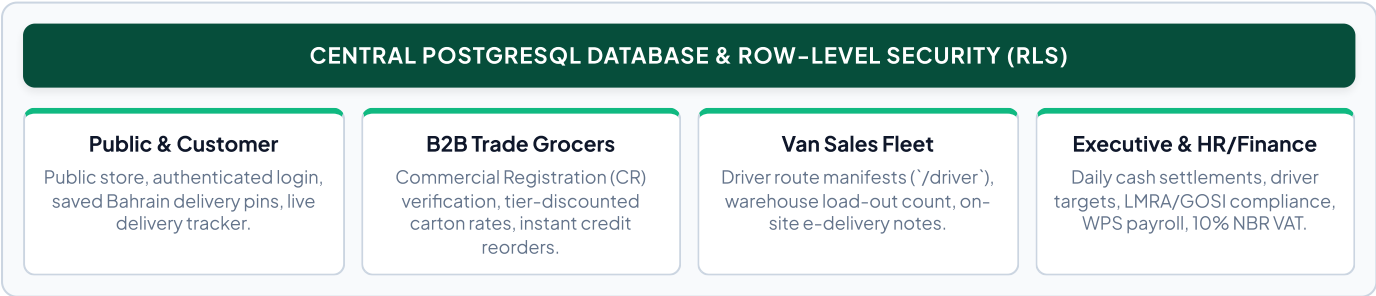

Dar Al Baba Salam (DAS Bahrain) has deployed an enterprise-grade digital portal representing its FMCG portfolio and core beverage distribution lines across Bahrain—led by the licensed distribution of **Alsi Cola**. To maximize profitability, streamline van sales operations, and eliminate costly third-party software subscriptions (such as SAP or monolithic ERPs), this initiative transforms the public-facing storefront into an **end-to-end Distribution Management System (DMS)**.

2. CURRENT PRODUCTION STATE: LIVE PLATFORM ASSETS

FEATURE MODULE	LIVE STATUS	OPERATIONAL CAPABILITY & VALUE DELIVERED
FMCG Catalogue & Search	LIVE	Full beverage, food, and non-food catalogue with real-time in-navbar autocomplete & category filtering.
Wholesale Packaging Selector	LIVE	Instant carton-to-unit toggling with automatic price recalculation for cold stores and trade buyers.
Frictionless Bahrain Checkout	LIVE	Automated basket valuation + integrated BenefitPay QR and localized WhatsApp order dispatch.
B2B Trade & Van Sales Hub	LIVE	Targeted wholesale trade portal capturing cold store, supermarket, and institutional leads across Bahrain.
Corporate Leadership Profile	LIVE	Glassmorphic executive showcase establishing credibility with international brand principals.
Bilingual & Mobile Optimized	LIVE	Instant English/Arabic (RTL) toggle; ergonomic 44px touch targets on iOS Safari & Android devices.

3. TARGET ARCHITECTURE: ONE UNIFIED RELATIONAL CORE

Rather than maintaining disconnected software systems, DAS Bahrain will scale a single **PostgreSQL relational database** protected by enterprise **Row-Level Security (RLS)**. This guarantees complete data isolation between external shoppers, verified B2B grocers, field drivers, and internal management.

4. FOUR-PHASE MODULAR IMPLEMENTATION ROADMAP

Phase 1: Customer Auth & Order Tracking

Month 1 (30 Days)

- Customer login via Bahrain Mobile OTP or secure Email credentials.
- Saved delivery address book (Governorate, Block, Road, Building).
- Live Order Pipeline:** `Received` → `Confirmed` → `Packed at Hidd` → `Out for Delivery` → `Delivered`.
- Customer purchase history and one-click re-ordering.

Phase 2: B2B Merchant Hub & Route Manifests

Month 2 (35 Days)

- B2B Cold Store & Baqala registration verified via Bahrain CR.
- Dynamic wholesale discount pricing tiers hidden from general retail.
- Mobile Driver Route Module (`/driver`) with assigned daily route stops.
- Instant electronic proof-of-delivery (e-POD) with signature capture.

Phase 3: Driver Performance & Cash Audit

Month 3 (30 Days)

- Daily Carton Targets vs. Actuals:** Track driver targets for Alsi Cola and partner FMCG brands.
- Store visit compliance monitoring (visited vs. bypassed).
- End-of-Shift Reconciliation:** Load-out inventory vs. physical returns vs. cash & BenefitPay receipts.
- Automated commission ledger tied to verified driver delivery logs.

Phase 4: HR, WPS Payroll & Bahrain 10% VAT

Month 4 (35 Days)

- Employee CPR registry, visa, and LMRA work permit renewal alerts.
- Salary calculation with base pay, overtime, commissions, and GOSI deductions.
- WPS Export:** SIF salary transfer file generation for Bahrain banks (NBB, BBK, AUB, Ila).
- Automated 10% NBR VAT audit ledger with Input/Output quarterly reporting.

5. COMMERCIAL VALUE & COST-BENEFIT ANALYSIS

OPERATIONAL DIMENSION	TRADITIONAL THIRD-PARTY ERP	DAS UNIFIED ARCHITECTURE
Annual Software Licensing	12,000 – 25,000 BHD recurring yearly fees	0 BHD licensing (Zero per-user software tax)
Field Stock & Cash Control	Manual paper receipts; delayed reconciliation	100% Real-Time daily van reconciliation
Customer & Baqala Experience	Disjointed phone calls & handwritten orders	Instant 30-sec reorders from mobile phone
Bahrain Regulatory Compliance	Manual spreadsheets for LMRA, WPS & VAT	Automated WPS banking exports & NBR VAT

6. STAKEHOLDER ACTION & CLEARANCE REQUEST

FORMAL RESOLUTION & SIGN-OFF

Management seeks board approval to proceed with **Phase 1: Database Setup, Customer Authentication & Live Order Tracking**. Execution will not disrupt any current live storefront operations.
